

A1 Travel Working

READ ME ABOUT OUR PROJECT FROM RECENT WORKING :

React + Vite

This template provides a minimal setup to get React working in Vite with HMR and some ESLint rules.

Currently, two official plugins are available:

- `[@vitejs/plugin-react]` (<https://github.com/vitejs/vite-plugin-react/blob/main/packages/plugin-react>) uses `[Babel]` (<https://babeljs.io/>) (or `[oxc]` (<https://oxc.rs>) when used in `[rolldown-vite]` (<https://vite.dev/guide/rolldown>)) for Fast Refresh
- `[@vitejs/plugin-react-swc]` (<https://github.com/vitejs/vite-plugin-react/blob/main/packages/plugin-react-swc>) uses `[SWC]` (<https://swc.rs/>) for Fast Refresh

React Compiler

The React Compiler is not enabled on this template because of its impact on dev & build performances. To add it, see [\[this documentation\]](https://react.dev/learn/react-compiler/installation) (<https://react.dev/learn/react-compiler/installation>).

Expanding the ESLint configuration

If you are developing a production application, we recommend using TypeScript with type-aware lint rules enabled. Check out the [\[TS template\]](https://github.com/vitejs/vite/tree/main/packages/create-vite/template-react-ts) (<https://github.com/vitejs/vite/tree/main/packages/create-vite/template-react-ts>) for information on how to integrate TypeScript and `[`typescript-eslint`](https://typescript-eslint.io)` in your project.

Then We create Our Component For the Website :

1. AuthModal.jsx :

In this module we can create our Login/Sign up button.

2. ChatBot.jsx :

In this module we can create our Chatbot Section.

3. Footer.jsx :

In this module we can create our Footer section or Lowest Part of the website.

4. HomePackages.jsx :

In this module we can create the slider section on the home page(Sliding Packages in the Home section).

5. Navbar.jsx :

In this module we can create our header section of the website.

6. PackageCard.jsx :

In this module we can create our Packages detail are given with this module .

Then We create Our Pages For the Website :

1. About.jsx :

In this module we can create our about section/detail about the company.

2. Contact.jsx :

In this module we can Contact or Talk to our executive.

3. Home.jsx :

In this module we can create our home pages.

4. Packages.jsx :

In this module we can give our packages details.

- **Then We create Our App.css For the Website :**

In this module where the front of the css are written.

- **Then We create Our App.jsx For the Website :**

In this module where all the file will route to each and every path.

- **Then We create Our Index.css For the Website :**

In this module where all the css are written.

- **Then We create Our Main.jsx For the Website :**

In this module where the react, ReactDOM, App and the index.css are linked.
